Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-56, and 57-66 to the extent that they read on a method of treating cancer, drawn to a method of treating cancer, classified in class 514, subclass 569.
- II. Claims 67-79, and 57-66 to the extent that they read on a method of treating graft versus host disease, drawn to a method of treating graft versus host disease, classified in class 514, subclass 569.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different function and different effects. The function and effect of Invention I is to induce cytotoxicity in a cell, while the function of Invention II is to treat or prevent host versus graft disease in a subject. Inducing cytotoxicity in a cell is not related to treating or preventing host versus graft disease. Therefore, the inventions are unrelated.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Furthermore, if Group I is elected, applicants are required under 35 U.S.C. 121 to elect a single disclosed species from the following patentably distinct species, even though this requirement is traversed:

1. The species of cancer cells selected from a leukemic cell or a solid tumor cell. If applicants elect the leukemic cell, they are further required to elect a specific leukemic cell from those recited in claim 8. If applicants elect a solid tumor cell they are further required to elect a specific leukemic cell from those recited in claim 10.

2. The species of chemotherapeutic agents from those recited in claims 21-24, 44, 48, 52 and 56.

If Group II is elected, applicants are required under 35 U.S.C. 121 to elect a single disclosed species from the following patentably distinct species, even though this requirement is traversed:

The species of immunotherapeutic agents for inducing apoptosis and treating host versus graft disease from those recited in claims 64 and 65 and 71 and 72, respectively.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Cook whose telephone number is (571) 272-0571. The examiner can normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Low, can be reached on (571) 272-0951.
